

Eye of Horus Anubis

Beyond Ancient Collection • Suggested placement and sizing reference

Suggested placement

BEST FIT — OUTER FOREARM

6.5–8.5 in tall

Vertical flow follows the forearm. Keep the Eye of Horus facing outward and leave breathing room near the wrist crease.

UPPER ARM / SHOULDER

7–10 in tall

Works well wrapping slightly toward the shoulder cap. Avoid shrinking the facial details below a readable transfer size.

OUTER CALF

8–11 in tall

Strong full-composition placement with enough flat area for the headdress, ears, and eye details.

UPPER BACK / SHOULDER BLADE

9–13 in tall

Best for a larger realism treatment. Centre the face first, then adjust the headdress to the body line.

Transfer setup

1. Print at 100% for the supplied Letter-size master, or scale proportionally without stretching.
2. Mirror only when the placement direction requires it; confirm orientation with the client before printing.
3. Test-fit the paper stencil on the body and mark the visual centre line before applying transfer solution.
4. Use the PNG/PDF for printing and the editable SVG when custom sizing or line cleanup is required.

Artist note

Suggested placement is a starting point, not a substitute for an in-person body-flow assessment. Final size, line weight, orientation, sanitation, and application remain the artist's responsibility.
